

2018 DRC APPROVED ROOFS

(Copied from a Consumer's Guide Shingle Report)

As the homes age in Kissimmee any so do the roofs. In order to assist the homeowners, the Design Review Committee has prepared a list of acceptable shingles and manufacturers. Please understand that these are shingles that are currently on the market and as standards in the industry change we will update his information. Be sure to show this list to your contractor so that you will have the ability to get a full picture of your cost and options. As always be sure to submit your DE RC External Alteration Application prior to contracting with any vendor. A member of the DRC must be notified prior to installation and upon completion.
